Report: FR-MULTI-20260930T064218Z-pdf
Generated (UTC): 2026-09-30T06:42:18+00:00

This is a system-generated report. All detections and validation results are subject to human analyst review and should be treated as reviewable observations, not conclusive findings.

Interpretation

The model generated the listed handgun and knife observations at the configured confidence threshold. A confidence score describes model certainty and is not an analyst decision. Analyst decisions document a later human assessment and do not replace or delete the original model observation.

Frame numbers are zero-based. Times are video-relative offsets and are not recording dates. Bounding boxes use [x1, y1, x2, y2] source-frame pixel coordinates. Counts represent frame observations, so the same physical object may appear more than once.

Object Detection Observations and Reviews

Each row is a frame observation. Confidence and cross-view matching remain reviewable. Session time is video time plus the camera offset; it is not a recording date/time. The CSV and JSON files contain all record identifiers, matching details and source references.
