Report: FR-CAM-01-20260930T064218Z

Generated (UTC): 2026-09-30T06:42:18+00:00

This is a system-generated report. All detections and validation results are subject to human analyst review and should be treated as reviewable observations, not conclusive findings.

Interpretation

The model generated the listed handgun and knife observations at the configured confidence threshold. A confidence score describes model certainty and is not an analyst decision. Analyst decisions document a later human assessment and do not replace or delete the original model observation.

Frame numbers are zero-based. Times are video-relative offsets and are not recording dates. Bounding boxes use [x1, y1, x2, y2] source-frame pixel coordinates. Counts represent frame observations, so the same physical object may appear more than once.

SHA-256 values below are historical fingerprints from the original report; no new file verification or chain-of-custody history is asserted.

Reformatted from the camera records printed in combined_forensic_detection_report.pdf (original generation: 2026-09-20T13:39:16.252142+00:00). The original export folder is unavailable. Printed values retain their original displayed precision. Source references and fingerprints are historical values copied from that report; source files and hashes have not been revalidated.
